Art	4

WORK EXPERIENCE

Caledonian Airborne Systems, Aberdeen

Design / Production Engineer

Producing drawings for mission systems in AutoCAD. From PCB level up to case view. Then making prototype PCB from scratch for R & D purposes. Moving onto producing a windows embedded image for the mission system. Where I would develop small programs to interface with windows embedded features.

Troubleshooting and testing / repairing issues with mission systems that came back in for repairs or upgrade.

Sainsbury's Berryden, Aberdeen

General Assistant in the Fresh Foods Department where my responsibilities include customer service, Replenishment, Stock Control, Cash handling and coping with unexpected situations. Since starting there I have been able to help reduce wastage from the company by offering some new ideas to make processes more productive.

Country Park Inn, Mintlaw

General Assistant

Wood Group at Shell St Fergus

General Assistant

I worked during shutdown period of plant replacing Valves and performing annual maintenance.

Shell, St Fergus

Trainee

Worked in the operations department where I carried out fire and gas alarm testing. I walked round plant taking readings of all instruments. I then compared these values to control room to ensure correct operation of all instruments. I worked with control room operator monitoring alarms and site problems.

Thank you for reading and I look forward to hearing from you.
